3D3 INGENIERIA carries out the structural engineering and M&E engineering for the request for tenders for a Contemporary Art Museum in Assilah designed by architects Hernandez de Leon and Alvaro Siza.

The project is intended to make a call for tenders to construction companies for the implementation of a new building that will house a Museum of Contemporary Art in Assilah, Morocco.

Documentation developed includes:

- Selection of typologies for all structural elements and instalations.
- Dimensioning of structure and foundations according to local standards.
- Design and calculation of mechanical and ellectrical installations according to local standards.
- Bill of quantities of the structure, HVAC, electricity, fire protection system, Telecommunication system, plumbing and sewerage

### DESCRIPTION
